

We (my family and I) are writing to the FCC in hopes that you will not do anything to disturb the current Indiana Do Not Call list. We hope that banks will not be permitted to start making these annoying calls. They want to talk to us about new services they are rolling out, I understand. We would prefer that they advertise in mass media as a way of letting the public know what services they offer. If we want that service, WE WILL CALL THEM. They are going to want to tell us about 50 new services and we will probably want one or two or NONE of them. For the first time in years, we are able to sit down to dinner and afterwards as a family without disturbing calls. Please don't change that.

Also, please don't allow contracted employees to solicit funds for Police and Fire charities which enjoy exemption from no-call. If we must hear from them about "supporting" their causes, let's make sure we are hearing from a REAL policeman or fireman.
